National Socialism

What is National Socialism?

National Socialism (or NS for short) is a worldview that seeks to safeguard the White race and ensure that it is protected in the future as well. We want our children and their children to be able to enjoy a safe and prosperous life, not one plagued with the violence and societal instability we see today.

Why the "National" in National Socialism?

In the context of NS, the word "Nationalism" means much more than simply patriotism or a love for one's country; it's a love for one's race. Plainly put, nationalism is a doctrine of blood that anchors the philosophy of NS in the predictable and observable realities of race.

We believe we should live according to our nature, not a foreign one!

So then, why is it called "Socialism"?

This is a common point of confusion, but let me assure you that in this context the term "Socialism" simply refers to the process of the individual joining the nation in thought and action. It is the logical continuation of nationalism where the love for one's own people burns so hot that it becomes logical to

prioritize the wellbeing of the group over strictly selfish desires. The way we are using the term here is not in an economic sense like communism, but rather in terms of societal organization and alignment.

We love OUR people and want to work collaboratively for OUR benefit!

Why does National Socialism care about race?

We understand that all men are not created equal and that similarities in natural capabilities and proclivities establish predictable patterns of behaviors that differ based on racial composition. We want to live in a way that makes sense to us and caters to our unique instincts, rather than those that are foreign to us.

Why National Socialism?

We need a National Socialist state because it is designed completely around the protection and continuation of our people. There is no loyalty to foreign interests or foreign money powers allowed, simply loyalty to the nation which it has been charged with serving. Due to demographic replacement in Europe and America, low White

reproductive rates and anti-White public sentiment, action is urgently needed to guarantee our future in this world. NS will restore our national identity and sovereignty to the people who it rightfully belongs to so that we may pursue the paths that are best for **OUR PEOPLE**.

Whites only make up around 10-15% of the world's population and are quickly becoming minorities in our own homelands!

Whites are the only race that consistently show an unhealthy lack of ingroup preference, as can be seen in the graphic below. If Whites don't start prioritizing race, we will be replaced in our own countries by those that promote and support their own.

Does National Socialism seek genocide?

No, of course, not. National socialism seeks the survival and well-being of our people. This is the entire objective. National Socialism does not seek world domination or the harm of others, preferring peaceful and mutually beneficial resolutions whenever possible. While NS does not seek to commit genocide, we do believe in taking whatever measures are needed to protect our people from the eradication we are currently facing.

Is National Socialism antisemitic?

NS is not inherently antisemitic, but it does reject all foreign influences that cause harm to the nation. If the Jamaicans controlled the nation's finances or sought to deceive the population through distorted representations of events in media, they would become the enemy of the nation. It does not matter who threatens the well-being of the nation, the response will always be the same. Rejection and self-defense.

There can be no distraction from the primary objective which is why in all areas of life a National Socialist asks: how does it impact the nation? Not “how does it harm the jews”? Anything short of total focus paid toward the wellbeing of the nation

strays from NS logic into a lower order of thought which is typically blinded by hate. NS is a positive and productive system, focused inward toward the needs of the nation. If the nation must adopt an antisemitic position to survive, National Socialism demands it does.

What's the alternative? An egalitarian death?

WE SEEK LIFE! WE DEMAND A FUTURE FOR OUR RACE!

Is National Socialism capitalistic?

No, National Socialism rejects capitalism because we prioritize the needs of the nation over individual profit and in doing so limit the capitalistic ventures that may result in harm to the community. NS views the economy as an entity that exists to fulfill the needs of the people, not to derive profit from the population it should be benefiting. The ultimate goal is national self sufficiency in order to truly separate foreign powers from the influence they may hold over the nation.

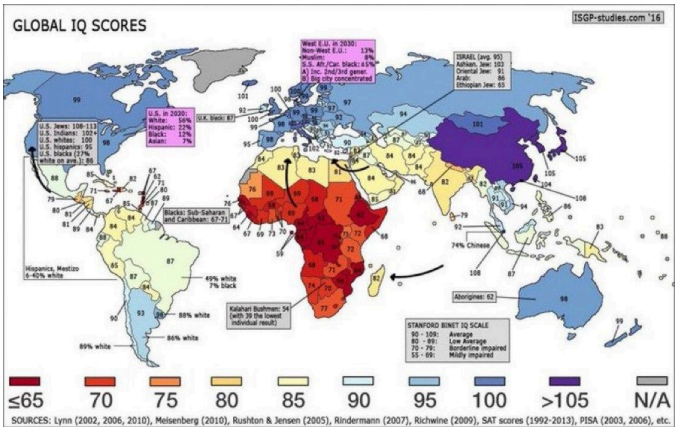
We **reject economic slavery** and seek a system where our hard work benefits us.

Is National Socialism against religion?

No, NS is not against religious practice so long as the practice does not harm the nation. We seek unity among all members of the nation, no matter their religious confession, provided it falls within the accepted scope of conduct.

Are the races really that different?

Yes! There are many differences between the races that range from the microbiome to bone density to IQ. All races form a unique perspective which is constructed through their unique composition and its interaction with the outside world, and **we seek to live according to ours, and ours alone**. We don't want to live like an African and we don't seek to force an African to live like us.



Is National Socialism about superiority?

No! NS is about living according to our standards, not midway between ours and a foreign way of life. It does not matter if we are superior or inferior, it only matters that we exist and that we seek to live in a way that is recognizable to our people.
